#### Basel III - Pillar 3 Disclosures as on 30.09.2015

#### 1. Scope of Application and Capital Adequacy

#### Table DF-1- Scope of application

Name of the head of the banking group to which the framework applies:-

Tamilnad Mercantile Bank Ltd.,

| Qualitative Disclosures  | Applicability to our Bank  |
|--|--|
| a. List of Group entities considered for consolidation.  | The Bank does not belong to any group and does not have any associate, subsidiaries, joint venture, etc. |
| b. List of Group entities not considered for consolidation both under the accounting and regulatory scope of consolidation.  | Not Applicable   |
| Quantitative Disclosures   |  |
| c. List of group entities considered for consolidation   | The Bank does not belong to any group and does not have any associate, subsidiaries, joint venture, etc. |
| d. The aggregate amount of capital deficiencies in all subsidiaries which are not included in the regulatory scope of consolidation i.e. that are deducted and the name(s) of such subsidiaries. | Not Applicable   |
| e. The aggregate amounts (e.g. Current book value) of<br>the bank's total interests in insurance entities, which<br>are risk-weighted.   | Not Applicable   |
| f. Any restriction or impediments on transfer of funds or regulatory capital within the banking group.   | Not Applicable   |

#### **Table DF-2-Capital Adequacy**

#### **Qualitative Disclosures**

# A. A summary discussion of the Bank's approach to assessing the adequacy of its capital to support current and future activities.

The Bank is following standardized approach, Standardized Duration approach and Basic Indicator approach for measurement of capital charge in respect of credit risk, market risk and operational risk respectively.

The computation of Capital for credit risk under Standardized Approach is done granularly borrower & account wise based on the data captured through Core

Banking Solution. Bank is also taking efforts on an ongoing basis for the accuracy of the data. The various aspects of NCAF norms are imparted to field level staff regularly through circulars and letters for continuous purification of data and to ensure accurate computation of Risk Weight and the Capital Charge. The Bank has used the credit risk mitigation in computation of capital for credit risk, as prescribed in the RBI guidelines under Standardized Approach.

The capital for credit risk on Loans and Advances, market risk and operational risk as per the prescribed approaches are being computed at the bank's Head Office and aggregated to arrive at the bank's CRAR position. The bank has followed the RBI guidelines in force, to arrive at the eligible capital funds, for computing CRAR.

Besides computing CRAR under the Pillar I requirement, the Bank also periodically undertakes stress testing in various risk areas to assess the impact of stressed scenario or plausible events on asset quality, liquidity, profitability and capital adequacy.

The bank conducts Internal Capital Adequacy Assessment Process (ICAAP) on annual basis to assess the sufficiency of its capital funds to cover the risks specified under Pillar- II of Basel guidelines. The adequacy of Bank's capital funds to meet the future business growth is also assessed in the ICAAP document, which is approved by the Board. While the surplus CRAR available at present acts as a buffer to support the future activities, the headroom available for the bank for mobilizing Tier 1 and Tier 2 capital (subject to approval by the competent authorities) is also assessed to meet the required CRAR against future activities.

The Bank has high quality Common Equity Tier 1 capital, as the entire components of CET1 capital comprises of Paid up Capital, Reserves & Surplus and retained earnings.

#### Minimum capital requirements under Basel-III:

Under the Basel III Capital Regulations, Banks are required to maintain a minimum Pillar 1 Capital (Tier-I + Tier-II) to Risk-weighted Assets Ratio (CRAR) of 9% on an on-going basis. Besides this minimum capital requirement, Basel III also provides for creation of capital conservation buffer (CCB). The transitional period of full implementation of Basel III capital regulation in India is extended up to March 31,2019. Accordingly the CCB requirements are to be implemented from March 31, 2016 in phases and are to be fully implemented by March 31, 2019 to the extent of 2.5% of Risk weighted Assets.

The total regulatory capital fund under Basel- III norms will consist of the sum of the following categories and banks are required to maintain 11.50% of Risk Weighted

Assets (9% + 2.5%) by March 2019 with the phase in requirements under CCB from 2016.

- Tier 1 Capital comprises of:
  - o Common Equity Tier 1 capital (with a minimum of 5.5%)
  - Additional Tier 1 capital (1.50%)
  - Total Tier 1 capital of minimum 7%
- Tier 2 Capital (2%)
  - Total Tier 1 + Tier 2 should be more than 9%
- Capital Conservation Buffer (CCB). (with a minimum of 2.5%)
  - Total capital including CCB should be 11.5%

In line with the RBI guidelines for implementing the New Capital Adequacy Frame Work under Basel III, the bank has successfully migrated from April 01, 2013.

### **Component of Capital:**

(₹ in millions)

| Particulars                         | Amount   |

#### 2. Risk exposure and Assessment

Risk is an integral part of banking business in an ever dynamic environment, which is undergoing radical changes both on the technology front and product offerings. The main risks faced by the bank are credit risk, market risk and operational risk. The bank aims to achieve an optimum balance between risk and return to maximize shareholder value. The relevant information on the various categories of risks faced by the bank is given in the ensuing sections. This information is intended to give market participants a better idea on the risk profile and risk management practices of the bank.

The Bank has a comprehensive risk management system in order to address various risks and has set up an Integrated Risk Management Department (RMD), which is independent of operational departments. Bank has a Risk Management Committee of Board functioning at apex level for formulating, implementing and reviewing bank's risk management measures pertaining to credit, market and operational risks. Apart from the Risk Management Committee of the Board at apex level, the Bank has a strong Bank-wide risk management structure comprising of Risk Management Committee of Executives (RMCE) and Asset Liability Management Committee (ALCO) at senior management level.

The Bank has formulated the required policies such as Loan Policy, Credit Risk Management Policy, Credit Risk Mitigation Techniques & Collateral Management Policy, ALM Policy, Operational Risk Policy, Investment Policy, Foreign Exchange Risk Management Policy, Policy for Hedging Foreign Currency Loan Exposure, Concurrent Audit Policy, Inspection Policies, IS Audit Policy, KYC policy, Post Credit Supervision Policy, Stock Audit Policy, Out Sourcing Policy, IT Business Continuity and Disaster Recovery Plan (IT BC-DRP), Risk Based Internal Audit Policy, Stress Testing Policy, Disclosure Policy, ICAAP Policy, etc for mitigating the risks in various areas and monitoring the same. The bank continues to focus on refining and improving its risk measurement and management systems.

#### Table DF-3- CREDIT RISK: GENERAL DISCLOSURES

#### **Qualitative Disclosures:**

#### a. Credit Risk

Credit risk is the possibility of losses associated with diminution in the credit quality of borrowers or counter-parties. In a Bank's portfolio, Credit Risk arises mostly from lending activities of the Bank, as a borrower is unable to meet his financial obligations to the lender. It emanates from potential changes in the credit quality / worthiness of the borrowers or counter-parties.

#### **Credit Rating & Appraisal Process**

The Bank has well structured internal credit rating framework and well-established standardized credit appraisal / approval processes. Credit Rating is a decision-enabling tool that helps the bank to take a view on acceptability or otherwise of any credit proposal. In order to widen the scope and coverage further and strengthen the credit risk management practices, the bank has developed risk sensitive rating models in-house during the year 2008-09 and 2009-10.

The internal rating factors take into consideration the quantitative and qualitative issues relating to management risk, business risk, industry risk, financial risk, credit discipline, and also risk mitigation, based on the collaterals available.

Credit rating, as a concept, has been well internalized within the Bank. The rating for eligible borrower is reviewed at least once in a year. The Bank uses the credit ratings for deciding the interest rates on borrowal accounts. The advantage of credit rating is that it enables to rank different proposals and do meaningful comparison.

With the view to migrate to advanced approaches in credit risk, the Bank has implemented the system driven rating using web based rating model solution (RAM & CRESS) acquired from M/s. Crisil Risk &Infrastructure solutions Ltd.,

The bank follows a well-defined multi layered discretionary power structure for sanction of loans. Credit Approval Grid has been constituted at H.O for considering in-principle approval for taking up fresh credit proposals above a specified cut-off.

#### **Credit Risk Management Policies**

The Bank has put in place a well-structured Credit Risk Management Policy duly approved by the Bank's Board. The Policy document defines organization structure, role & responsibilities and, the processes whereby the Credit Risks carried by the Bank can be identified, quantified & managed within the framework that the Bank considers consistent with its mandate and risk tolerance.

Credit Risk is monitored on a bank-wide basis and compliance with the risk limits approved by Board/Risk Management Committee of Board is ensured.

The Bank has taken earnest steps to put in place best credit risk management practices in the bank. In addition to Credit Risk Policy, the bank has also framed Board approved Loan Policy, Investment Policy etc. which forms integral part in monitoring Credit risk in the bank. Besides, the bank has framed a policy on Credit Risk Mitigation Techniques & Collateral Management with the approval of the Board which lays down the details of securities (both Primary and Collateral) normally

accepted by the Bank and administration of such securities to protect the interest of the Bank. These securities act as mitigation against the credit risk to which the bank is exposed.

#### Classification of Non Performing Assets

The Bank follows the prudential guidelines issued by the RBI on classification of non-performing assets as under,

- i) interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan.
- ii) the account remains 'out of order' if the outstanding balance remains continuously in excess of sanctioned limits / DP for more than 90 days in respect of Overdraft/Cash Credit (OD/CC).
- iii) the bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted
- iv) the installment of principal or interest thereon remains overdue for two crop seasons for short duration crop.
- v) the installment of principal or interest thereon remains overdue for one crop season for long duration crops.
- vi) in respect of derivative transactions, the overdue receivables representing positive mark-to-market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment

Where the interest charged during any quarter is not serviced fully within 90 days from the end of the quarter, the account is classified as non-performing. A non-performing asset ceases to generate income for the bank.

# b. Gross Credit Risk exposures as on 30<sup>th</sup> September 2015.

| Category                    | Gross Credit Exposure |
|-----------------------------|-----------------------|
| Fund Based 1                | 268212.21             |
| Non Fund Based <sup>2</sup> | 35683.29              |
| Total                       | 303895.50             |

- 1. Fund based exposure includes advances, un-availed portion of fund based advances.
- 2. Non-Fund Based exposure includes outstanding Letter of Credit, Acceptances, Bank Guarantee Exposures and credit equivalent of Forward Contracts.

# c. Geographical Distribution of Gross Credit Exposures as on 30<sup>th</sup> September 2015

#### Table DF - 4

# CREDIT RISK: DISCLOSURES FOR PORTFOLIOS SUBJECT TO THE STANDARDISED APPROACH

#### **Qualitative disclosures:**

#### a) General Principle:

In accordance with RBI guidelines, the Bank had adopted Standardized Approach of the New Capital Adequacy Framework (NCAF) for computation of capital for Credit Risk with effect from 31.03.2009. In computation of capital, the bank has assigned risk weights to different assets classified as prescribed by the RBI.

#### **External Credit Ratings:**

Ratings of borrowers by External Credit Rating Agencies (ECRA) assume importance in the light of guideline for implementation of the New Capital Adequacy Framework (Basel-II). Exposures on Corporate / PSEs / Primary Dealers are assigned with risk weights based on the external ratings. For this purpose, the Reserve Bank of India has permitted Banks to use the rating of the six domestic ECRAs namely (a) Credit Analysis and Research Ltd., (CARE), (b) CRISIL Ltd., (c) India Ratings and Research P. Ltd., (India Ratings)., (d) ICRA Ltd., (e) Brickwork Ratings India P. Ltd (Brickwork) and (f) SMERA Rating Limited (SMERA). In consideration of the above guidelines the bank has decided to accept the ratings assigned by all these ECRAs.

The bank has well-structured internal credit rating mechanism to evaluate the credit risk associated with a borrower and accordingly the systems are in place for taking credit decisions with regard to acceptability of proposals, and level of exposures and pricing.

In case of bank's investment in particular issues of Corporate / PSEs, the issue specific rating of the approved ECRAs are reckoned and accordingly the risk weights have been applied after a corresponding mapping to rating scale provided.

As regards the coverage of exposures by external ratings as relevant for capital computation under Standardized Approach, the process is being popularized among the borrowers so as to take the benefit of capital relief available for better rating of its customers. At the same time, the Bank is well aware and prepared for the application of higher risk weight (100%) for the unrated exposures relating to all fresh sanctions or renewals in excess of the threshold limit prescribed by Reserve Bank of India. The Bank follows below mentioned procedures as laid down in the Basel II quidelines for usage of external ratings:

- Rating assigned by one rating agency is used for all the types of claims on the borrowing entity.
- Long term ratings are used for facilities with contractual maturity of one year & above.
- Short term ratings are generally applied for facilities with contractual maturity of less than one year.

#### **Quantitative Disclosures**

For exposure amounts after risk mitigation subject to the standardized approach, amount of a bank's outstanding (rated and unrated) in the following three major risk buckets as well as those that are deducted as per risk mitigation are given below;

|                                    |          | ,         | ( *       |
|------------------------------------|----------|-----------|-----------|
| Risk Weight                        | Rated    | Unrated   | Total *   |
| Below 100%                         | 19294.31 | 118514.18 | 137808.49 |

| Deducted (as per Risk Mitigation)  | 12320.28 | 34946.78  | 47267.07  |
| Total outstanding after mitigation | 68866.57 | 171292.40 | 240158.96 |

<sup>\*</sup> This includes total gross credit exposure i.e. (FB+ NFB+ undrawn or partially undrawn fund based facility)

#### Table DF – 5

# CREDIT RISK MITIGATION: DISCLOSURE FOR STANDARDISED APPROACHES

#### **Qualitative disclosures:**

#### Policy on Credit Risk Mitigation under Standardized Approach:

As advised by RBI, the Bank has adopted the comprehensive approach relating to credit risk mitigation under Standardized Approach, which allows fuller offset of securities (primary and collateral) against exposures, by effectively reducing the exposure amount by the value ascribed to the securities. Thus the eligible financial collaterals are fully made use of to reduce the credit exposure in computation of credit risk capital. In doing so, the bank has recognized specific securities namely (a) bank's own deposits (b) Gold/Ornaments (c) Life Insurance Policies (d) Government Securities (e) NSC/KVP etc and (f) Units of Mutual Funds, in line with the RBI guidelines on the subject.

Besides, other approved forms of credit risk mitigation are "On Balance Sheet netting" and availability of "Eligible Guarantees". On balance sheet nettings has been reckoned to the extent of the deposits available against the loans /advances of the borrower (to the extent of exposure) as per the RBI guidelines. Further, in computation of credit risk capital, the types of guarantees recognized for taking mitigation, in line with RBI guidelines are (a) Central Government Guarantee (0%) (b) State Government (20%) (c) CGTMSE (0%) (d) ECGC (20%) (e) Bank Guarantee in the form of bills purchased / discounted under Letter of credit (20%) and (f) Credit Risk Guarantee Fund Trust for Low Income Housing (CRGFTLIH) (0%). The Bank has ensured compliance of legal certainty as prescribed by the RBI in the matter of credit risk mitigation.

#### **Concentration Risk in Credit Risk Mitigation:**

All types of securities eligible for mitigation are easily realizable financial securities. As such, presently no limit/ceiling has been prescribed to address the concentration risk in credit risk mitigants recognized by the Bank.

#### Table DF-7

#### MARKET RISK IN TRADING BOOK

#### **Qualitative Disclosures:**

#### a) Market Risk:

Market Risk is defined as the possibility of loss to a bank in on-balance sheet and off-balance sheet positions caused by the changes / movements in the market variables such as interest rates, foreign currency exchange rates, equity prices and commodity prices. Bank's exposure to market risk arises from domestic investments (interest related instruments and equities) in trading book (both AFS and HFT categories), the Foreign exchange positions (including open position in precious metals) and trading related derivatives. The objective of the market risk management is to minimize the impact of losses on earnings and equity capital arising from market risk.

#### Policies for management of Market Risk:

The bank has put in place Board approved Asset Liability Management (ALM) policy and treasury Policy (Investment Policy) for effective management of market risk in the bank. The policy sets various risk limits for effective management of market risk and ensuring that the operations are in line with Bank's expectation of return to market risk through proper Asset Liability Management. The policy also deals with the reporting framework for effective monitoring of market risk.

The ALM policy specifically deals with liquidity risk management and interest rate risk management framework. As envisaged in the policy, Liquidity risk is managed through the mismatch analysis, based on residual maturity / behavioral pattern of assets and liabilities, on a daily basis based on best available data coverage, as prescribed by the RBI. The bank has put in place mechanism of short-term dynamic liquidity management and contingent funding plan. Prudential (tolerance) limits are prescribed for different residual maturity time buckets for efficient asset liability management. Liquidity profile of the bank is evaluated through various liquidity ratios. The bank has also drawn various contingent measures to deal with any kind of stress on liquidity position. Bank ensures adequate liquidity managed on a real time basis by Domestic Treasury through systematic and stable funds planning.

Interest Rate Risk is managed through use of GAP analysis of rate sensitive assets and liabilities and monitored through prudential (tolerance) limits prescribed. The bank has also put in place Duration Gap Analysis framework for management of interest rate risk. The bank estimates Earnings at Risk (EaR) and Modified Duration Gap (DGAP) periodically against adverse movement in interest rate (as prescribed in the Policy) for assessing the impact on Net Interest Income (NII) and Economic Value of Equity (EVE) with a view to optimize shareholder value.

The Asset-Liability Management Committee (ALCO) /Risk Management Committee of Board (RMCB) monitors adherence of prudential limits fixed by the bank and determines the strategy in the light of the market condition (current and expected) as articulated in the ALM policy.

#### **Quantitative Disclosures:**

b) In line with the RBI's guidelines, the bank has computed capital for market risk as per Standardized Duration Approach (SDA) framework for maintaining capital.

The Capital requirements for market risk in trading Book as on 30.09.2015

#### (₹ in millions)

#### <u>Table DF - 8</u> OPERATIONAL RISK

#### **Qualitative Disclosures:**

#### a) Operational Risk:

Operational Risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk includes legal risk but excludes strategic and reputation risks.

#### Policies on management of Operational Risk:

The Bank has framed Operational Risk Management Policy duly approved by the Bank's Board. Other policies adopted by the Board which deal with management of Operational risk are (a) Information Systems Security Policy, (b) Foreign Currency Risk Management Policy (c) Policy document on Know Your Customers (KYC) and Anti Money Laundering (AML) Procedures (d) IT Business Continuity and Disaster Recovery Plan (IT BC-DRP).

The Operational Risk Management Policy adopted by the Bank outlines organization structure and detail processes for management of operational risk. The basic objective of the policy is to closely integrate operational risk management system into the day-to-day risk management processes of the bank by clearly assigning roles for effectively identifying, assessing, monitoring and controlling / mitigating operational risk and by timely reporting of operational risk exposures, including material operational losses. Operational risks in the Bank are managed through comprehensive and well-articulated internal control frameworks.

#### **Quantitative Disclosures:**

b) In line with the final guidelines issued by RBI, our Bank has adopted the Basic Indicator Approach for computing capital for Operational Risk. As per the guidelines, the capital charge for Operational Risk is equal to the average over the previous three years (2012-13, 2013-14 & 2014-15) of 15% of positive annual Gross Income as defined by RBI. As per such estimate, the capital requirement for operational risk as on 30.09.2015 is ₹ 1669.40 mn.

#### Table DF – 9

#### INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)

#### **Qualitative Disclosures:**

#### a) <u>Interest Rate Risk in the Banking Book:</u>

Interest Rate Risk is the risk where changes in the market interest rates might affect a bank's financial condition. Changes in interest rates affect both the current earnings (earnings perspective) as also the net worth of the Bank (economic value perspective). The risk from earnings perspective can be measured as impact in the Net Interest Income (NII) or Net Interest Margin (NIM). Similarly, the risk from economic value perspective can be measured as drop in the Economic value of Equity (EVE).

The Bank identifies the risks associated with the changing interest rates on its on-balance sheet and off-balance sheet exposures in the banking book from a short term (Earning perspective) and long term (Economic value perspective). The impact on income (Earning perspective) is measured through use of Gap Analysis by applying notional rate shock upto 200 bps as prescribed in Bank's ALM policy. Prudential limits have been prescribed for such impacts as a percentage to NII of the Bank and the same is monitored periodically on a fortnightly basis. For the calculation of impact on earnings, the Traditional Gap is taken from the Rate Sensitivity Statement and based on the remaining period from the mid point of a particular bucket the impact for change in interest rates upto 100 bps is arrived at. The same is reported to ALCO/Risk Management Committee of Board (RMCB) periodically along with the Rate Sensitivity statement on monthly basis. Such limits are fixed based on the previous year's NII.

The Bank has adopted Traditional Gap Analysis combined with Duration Gap Analysis for assessing the impact (as a percentage) on the Economic value of Equity (Economic Value Perspective) by applying a notional interest rate shock of 200 bps. As per the Guidelines on Banks" Asset Liability Management Framework-Interest Rate Risk issued by the RBI (DBOD.No.BP.BC.59/21.04.098/2010-11 dated 04.11.2010), the Bank calculates Modified Duration Gap (DGAP) & the impact on the Economic Value of equity (EVE). Assets and Liabilities are grouped as per Rate Sensitivity Statement & bucket wise Modified Duration is computed for these groups of Assets (excluding investments) and Liabilities using common maturity, coupon and yield parameters. For investment portfolio, the Modified Duration of individual items are computed and taken. The DGAP is calculated by the Bank once in a month and is reported to ALCO/ Risk Management Committee of Board (RMCB).

The Asset-Liability Management Committee (ALCO) / Risk Management Committee of Board (RMCB) monitors adherence of prudential limits fixed by the bank and determines the strategy in the light of market conditions (current and expected).

#### **Quantitative Disclosures:**

The increase or decrease in earnings and economic value for upward and downward rate shocks based on the assets and liabilities outstanding as on 30.09.2015 are as follows.

- 1. The impact of change in Interest Rate i.e Earnings at Risk for increasing 100 Basis points interest rate shock is ₹321.39mn (3.638% of previous year Net Interest Income).
- 2. Change in Market Value of Equity for 200 basis points interest rate shock is ₹ 2823.18mn (10.16% of Net worth)

# TABLE DF – 10 General disclosures for exposures related to counterparty credit risk

Counterparty Credit Risk (CCR) is the risk that a counter party to a transaction could default before the final settlement of the transaction cash flows. Unlike a firm's exposure to credit risk through a loan, where the exposure to credit risk is unilateral and only the lending bank faces the risk of loss, CCR creates a bilateral risk of loss to either party.

Counterparty credit risk in case of derivative contracts arises from the forward contracts. The subsequent credit risk exposures depend on the value of underlying market factors (e.g., interest rates and foreign exchange rates), which can be volatile and uncertain in nature. The Bank does not enter into derivative transactions other than forward contracts.

#### Credit exposures on forward contracts

The Bank enters into the forward contracts in the normal course of business for proprietary trading and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate and foreign currency risk. Derivative exposures are calculated according to the current exposures method.

#### Counterparty Credit exposure as on September 30, 2015

| Nature            | Notional<br>Amount | Current Credit<br>Exposure<br>(positive mark to<br>market value) | Potential<br>Future Credit<br>Exposure | Total Credit Exposure under Current Exposure Method (CEM) |
|-------------------|--------------------|--|--|---|

#### Step 2:

- 1) As the Bank is not having any subsidiary, no disclosure relating any legal entity for regulatory consolidation is made.
- 2) The entire paid up capital of the Bank amounting to ₹2.85 million is included in CET I. (refer Item I of DF-11)
- 3) The break up for Reserves & Surplus ₹ 27784.34 mn as shown in the Bank's financial statements is given hereunder for the purpose of reconciliation for calculation of Regulatory Capital in DF-11.

| As per Balance Sheet        | Amount   | As shown in DF-11 Capital                   |
|-----------------------------|----------|---|
| a) Statutory Reserves       | 8787.79  | Included in Regulatory CET I capital DF-11  |
|                             |          | (item-3)                                    |
| b) Capital Reserves         | 109.27   | Included in Regulatory CET I capital DF-11  |
|                             |          | (item-3)                                    |
| c)Revenue and Other         | 16096.41 | Included in Regulatory CET I capital DF-11  |
| Reserves                    |          | (item-3)                                    |
| d) Investment reserve       | 193.96   | Included in Regulatory Tier II capital DF-  |
|                             |          | 11(item-50)                                 |
| e) Special Reserve u/s      | 739.00   | Included in Regulatory CET I Capital (DF11- |
| 36(1) (Viii) of IT Act 1961 |          | item 3)                                     |
| f) Balance in P&L upto      | 13.86    | Included in CET I (item 3- DF11)            |
| 31.03.2015                  |          |   |
| g) Additional Balance of    | 1844.05  | NA  |
| Profit (for 2 quarters)     |          |   |
|                             | 27784.34 |   |

- 4) Other Liabilities:-a) Provision for Standard assets including restructured standard assets ₹998.29mn. (item-50 DF-11)
  - b) Provision for unhedged Foreign Currency Exposure ₹22.30mn.(item-50 -DF-11)

However they are shown under Tier II capital for computation of Regulatory Capital (DF-11) as noted in brackets as per extant RBI guidelines.

Step 3

Extract of Basel III common disclosure template (with added column) - Table DF-11 (Part I / Part II whichever, applicable) Common Equity Tier 1 capital: instruments and reserves Source based on reference numbers Component of regulatory letters of the balance sheet under the capital by regulatory scope reported of consolidation from step bank Directly issued qualifying common share (and equivalent for non-joint stock companies) capital plus related stock surplus 2.85 Retained earnings 27784.34 Accumulated other comprehensive income (and other reserves) Directly issued capital subject to phase out from CET1 (only applicable to non-joint stock Common share capital issued by subsidiaries and held by third parties Common Equity Tier 1 capital before 25749.18 regulatory adjustments Prudential valuation adjustments 0.00 Goodwill (net of related tax liability)

# <u>Table DF – 16</u> Equities-Disclosure for Banking Book Positions

The bank has no exposures in equities under Banking Book.

#### Table DF - 17- Leverage Ratio Disclosure

The Leverage ratio act as a credible supplementary measure to the bank based capital requirement. The Bank is required to maintain a minimum leverage ratio of 4.5%. The Bank's leverage ratio, calculated in accordance with the RBI guidelines is as follows;

# COMPARISON OF ACCOUNTING ASSETS AND LEVERAGE RATIO EXPOSURE

(₹in millions)

| S.No. | Particulars  | Amount    |
|-------|--|-----------|
| 1     | Total consolidated assets as per published financial statements  | 323371.15 |
| 2     | Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation | 0.00      |
| 3     | Adjustment for fiduciary assets recognized on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure               | 0.00      |
| 4     | Adjustments for derivative financial instruments   | 1801.83   |
| 5     | Adjustment for securities financing transactions (i.e. repos and similar secured lending)  | 0.00      |
| 6     | Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures)  | 34202.89  |
| 7     | Other adjustments  | 0.00      |
| 8     | Leverage ratio exposure  | 359375.87 |
